Tumor Antigens Recognized by T Cells and Antibodies (Tumor Immunology and Immunotherapy)

Giorgio Parmiani

Recent progress in tumor immunology has led to immunotherapy trials in patients with solid tumors and hematological malignancies. The discovery of tumor antigens capable of eliciting immune responses has now resulted in the development of antigen-specific immunotherapy strategies. Tumor Antigens Recognized by T Cells and Antibodies provides a comprehensive overview of the molecular nature of tumor antigens that can be recognized by antibodies, helper T lymphocytes and cytotoxic T lymphocytes. In this book, international experts provide crucial information for clinicians and researchers with an interest in cancer immunotherapy.
