ASEAN, PRC, and India: The Great Transformation ADBI, ADB

Asia's remarkable economic performance and transformation since the 1960s has shifted the center of global economic activity toward Asia, in particular toward the Association of Southeast Asian Nations (ASEAN) economies, the People's Republic of China, and India (collectively known as ACI).

While these dynamic developing economies do not form any specific institutional group, they constitute very large economies and markets. These emerging Asian giants share common boundaries, opportunities, and challenges. Their trade, investment, production, and infrastructure already are significantly integrated and will become more so in the coming decades.

This book focuses on the prospects and challenges for growth and transformation of the region's major and rapidly growing emerging economies to 2030. It examines the drivers of growth and development in the ACI economies and the factors that will affect the quality of development. It also explores the links among the ACI economies and how their links may shape regional and global competition and cooperation.
