## **Basics of Environmental Science** Michael Allaby

The new edition of this popular student text offers an engaging introduction to environmental study. It covers the entire breadth of the environmental sciences, providing concise, non-technical explanations of physical processes and systems and the effects of human activities. In this second edition the scientific background to major environmental issues is clearly explained. These include:

- \* global warming
- \* genetically modified foods
- \* desertification
- \* acid rain
- \* deforestation
- \* human population growth
- \* depleting resources
- \* nuclear power generation
- \* descriptions of the 10 major biomes.

Special student text features include illustrations and explanatory diagrams, boxed case studies, concepts and definitions.
