Biotechnology of Bioactive Compounds: Sources and Applications

Biotechnology of Bioactive Compounds: Sources and Applications

Bioactive compounds play a central role in high-value product development in the chemical industry. Bioactive compounds have been identified from diverse sources and their therapeutic benefits, nutritional value and protective effects in human and animal healthcare have underpinned their application as pharmaceuticals and functional food ingredients. The orderly study of biologically active products and the exploration of potential biological activities of these secondary metabolites, including their clinical applications, standardization, quality control, mode of action and potential biomolecular interactions, has emerged as one of the most exciting developments in modern natural medicine.

Biotechnology of Bioactive Compounds describes the current stage of knowledge on the production of bioactive compounds from microbial, algal and vegetable sources. In addition, the molecular approach for screening bioactive compounds is also discussed, as well as examples of applications of these compounds on human health. The first half of the book comprises information on diverse sources of bioactive compounds, ranging from microorganisms and algae to plants and dietary foods. The second half of the book reviews synthetic approaches, as well as selected bioactivities and biotechnological and biomedical potential. The bioactive compounds profiled include compounds such as C-phycocyanins, glycosides, phytosterols and natural steroids. An overview of the usage of bioactive compounds as antioxidants and anti-inflammatory agents, anti-allergic compounds and in stem cell research is also presented, along with an overview of the medicinal applications of plant-derived compounds.

Biotechnology of Bioactive Compounds will be an informative text for undergraduate and graduate students of bio-medicinal chemistry who are keen to explore the potential of bioactive natural products. It also provides useful information for scientists working in various research fields where natural products have a primary role.

From reader reviews:

Sandy Holiday:

Book is written, printed, or outlined for everything. You can recognize everything you want by a publication. Book has a different type. As we know that book is important thing to bring us around the world. Alongside that you can your reading proficiency was fluently. A publication Biotechnology of Bioactive Compounds: Sources and Applications will make you to possibly be smarter. You can feel much more confidence if you can know about every thing. But some of you think this open or reading any book make you bored. It's not make you fun. Why they might be thought like that? Have you seeking best book or acceptable book with you?

Dawn Hicks:

As people who live in the particular modest era should be change about what going on or info even knowledge to make these people keep up with the era that is certainly always change and move ahead. Some of you maybe will certainly update themselves by looking at books. It is a good choice for you personally but the problems coming to you is you don't know what one you should start with. This Biotechnology of Bioactive Compounds: Sources and Applications is our recommendation to make you keep up with the world. Why, because this book serves what you want and want in this era.

Jeffrey Primo:

Do you one of people who can't read gratifying if the sentence chained inside straightway, hold on guys this particular aren't like that. This Biotechnology of Bioactive Compounds: Sources and Applications book is readable by you who hate the straight word style. You will find the details here are arrange for enjoyable looking at experience without leaving possibly decrease the knowledge that want to deliver to you. The writer regarding Biotechnology of Bioactive Compounds: Sources and Applications content conveys thinking easily to understand by lots of people. The printed and e-book are not different in the content but it just different such as it. So , do you even now thinking Biotechnology of Bioactive Compounds: Sources and Applications is not loveable to be your top checklist reading book?

Michael Robinson:

Do you like reading a reserve? Confuse to looking for your selected book? Or your book ended up being rare? Why so many concern for the book? But almost any people feel that they enjoy to get reading. Some people likes reading through, not only science book but also novel and Biotechnology of Bioactive Compounds: Sources and Applications or others sources were given know-how for you. After you know how the truly amazing a book, you feel desire to read more and more. Science guide was created for teacher as well as students especially. Those guides are helping them to add their knowledge. In different case, beside science reserve, any other book likes Biotechnology of Bioactive Compounds: Sources and Applications to make your spare time considerably more colorful. Many types of book like here.
