Conference on Industrialization, made the This study examines the factors which affect the location of mineral processing in developing countries. These can be divided into two broad "National industrialization policies should categories. The first of these encompasses stress the objective of increasing the external economic and technical elements affecting the autonomy of the developing regions and countries, 1 basic viability of a project. These include capital, with special attention to the promotion of skilled labour, raw materials, complementary exports . . . (and) also seek to increase the value inputs, energy, economies of scale, technological added to raw materials being processed and change, growth in demand, proximity to export markets and transport costs. The second consists In the light of the foregoing, it is proposed that of structural elements including sources of finance national industrialization policies should: (a) price and technology, trade and investment and more integrated industrialization based on the taxation policies.
