Progress in Behavior Modification: Volume 5 Richard M. Eisler, Peter M. Miller

Progress in Behavior Modification, Volume 5, is a multidisciplinary serial publication that encompasses the contributions of psychology, psychiatry, social work, speech therapy, education, and rehabilitation. This serial aims to meet the need for a review publication that undertakes to present yearly in-depth evaluations that include a scholarly examination of theoretical underpinnings, a careful survey of research findings, and a comparative analysis of existing techniques and methodologies. The discussions center on a wide spectrum of child and adult disorders.

The book opens with a chapter on the assessment and treatment of minimal dating behavior in college students. This is followed by separate chapters on methods of behavioral control of excessive drinking; behavioral analysis and treatment of child noncompliance to parental requests; and behavioral group therapy. Subsequent chapters deal with the conceptual underpinnings of research in children's self-management and treatment strategies; the assessment and therapeutic functions of self-monitoring; and behavioral treatment in homosexuality.
