Burrowing Shrimps and Seagrass Dynamics in Shallow-Water Meadows off Bolinao (New Philippines): UNESCO-IHE PhD Hildie Maria E. Nacorda

Based on research in Bolinao, this book assesses the importance of small-scale disturbance by burrowing shrimps. It covers the distribution of burrowing shrimp disturbance, the behavior of the snapping shrimp *Alpheus macellarius in situ* and as observed from tank experiments, and the effects of short-term burial and leaf clipping on the growth patterns of the dominant seagrass *Thalassia hemprichii*. The book examines the role of bioturbation by burrowing shrimps in seagrass meadows, foraging strategies of *A. macellarius* and its mutualistic symbiosis with *Cryptocentrus spp.*, shrimp disturbance and *T. hemprichii*, and small-scale disturbance and large-scale dynamics.
