Powering the Armed Forces: Meeting the Military's Energy Challenges George P. Shultz, Jeremy Carl, Gary Roughead, Manuel Hernandez

Powering the Armed Forces offers a perspective on the impressive work now under way in the US military forces to address energy challenges and ultimately achieve energy security. Drawn from a Hoover Institution conference in December 2011, contributors to the book include senior defense officials from the Office of the Secretary of Defense, Departments of the Army, Navy, Marine Corps, and Air Force, as well as representatives from the National Defense University and Naval Postgraduate School.

The authors discuss energy security and the defense department's contribution to energy issues from the strategic level to the operational and tactical battlefield environment. They reveal how energy critically relates to our national security mission and to the effectiveness and safety of our men and women fighting on land, at sea, and in the air. Most importantly, they show that the defense department is committed to improving our nation's energy position and to demonstrating its ability to influence events through its commitment to sound policies and tangible contributions across the spectrum of energy security.
