Unifying the Mind: Cognitive Representations as Graphical Models (MIT Press) David Danks

Our ordinary, everyday thinking requires an astonishing range of cognitive activities, yet our cognition seems to take place seamlessly. We move between cognitive processes with ease, and different types of cognition seem to share information readily. In this book, David Danks proposes a novel cognitive architecture that can partially explain two aspects of human cognition: its relatively integrated nature and our effortless ability to focus on the relevant factors in any particular situation. Danks argues that both of these features of cognition are naturally explained if many of our cognitive representations are understood to be structured like graphical models. The computational framework of graphical models is widely used in machine learning, but Danks is the first to offer a book-length account of its use to analyze multiple areas of cognition. Danks demonstrates the usefulness of this approach by reinterpreting a variety of cognitive theories in terms of graphical models. He shows how we can understand much of our cognition -- in particular causal learning, cognition involving concepts, and decision making -- through the lens of graphical models, thus clarifying a range of data from experiments and introspection. Moreover, Danks demonstrates the important role that cognitive representations play in a unified understanding of cognition, arguing that much of our cognition can be explained in terms of different cognitive processes operating on a shared collection of cognitive representations. Danks's account is mathematically accessible, focusing on the qualitative aspects of graphical models and separating the formal mathematical details in the text.

From reader reviews:

Van Gee:

Playing with family in the park, coming to see the ocean world or hanging out with close friends is thing that usually you could have done when you have spare time, subsequently why you don't try thing that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Unifying the Mind: Cognitive Representations as Graphical Models (MIT Press), you may enjoy both. It is excellent combination right, you still would like to miss it? What kind of hang type is it? Oh occur its mind hangout men. What? Still don't obtain it, oh come on its called reading friends.

Michael Martin:

You could spend your free time to see this book this publication. This Unifying the Mind: Cognitive Representations as Graphical Models (MIT Press) is simple to deliver you can read it in the park your car, in the beach, train in addition to soon. If you did not possess much space to bring typically the printed book, you can buy the particular e-book. It is make you quicker to read it. You can save the particular book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Leonard Jones:

Beside this specific Unifying the Mind: Cognitive Representations as Graphical Models (MIT Press) in your phone, it can give you a way to get more close to the new knowledge or data. The information and the knowledge you are going to got here is fresh in the oven so don't end up being worry if you feel like an aged people live in narrow commune. It is good thing to have Unifying the Mind: Cognitive Representations as Graphical Models (MIT Press) because this book offers for you readable information. Do you often have book but you rarely get what it's interesting features of. Oh come on, that will not end up to happen if you have this in your hand. The Enjoyable set up here cannot be questionable, just like treasuring beautiful island. So do you still want to miss this? Find this book in addition to read it from at this point!

Alice Prah:

What is your hobby? Have you heard this question when you got students? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every person has different hobby. So you know that little person just like reading or as reading through become their hobby. You need to know that reading is very important along with book as to be the factor. Book is important thing to incorporate you knowledge, except your own personal teacher or lecturer. You discover good news or update about something by book. Numerous books that can you take to be your object. One of them is niagra Unifying the Mind: Cognitive Representations as Graphical Models (MIT Press).
