Graph Theory and Interconnection Networks

Lih-Hsing Hsu, Cheng-Kuan Lin

Graph Theory and Interconnection Networks Lih-Hsing Hsu, Cheng-Kuan Lin

The advancement of large scale integrated circuit technology has enabled the construction of complex interconnection networks. Graph theory provides a fundamental tool for designing and analyzing such networks. Graph Theory and Interconnection Networks provides a thorough understanding of these interrelated topics. After a brief introduction to graph terminology, the book presents well-known interconnection networks as examples of graphs, followed by in-depth coverage of Hamiltonian graphs. Different types of problems illustrate the wide range of available methods for solving such problems. The text also explores recent progress on the diagnosability of graphs under various models.

From reader reviews:

Janet Smith:

Spent a free a chance to be fun activity to complete! A lot of people spent their free time with their family, or their own friends. Usually they carrying out activity like watching television, going to beach, or picnic from the park. They actually doing same every week. Do you feel it? Will you something different to fill your personal free time/ holiday? May be reading a book is usually option to fill your free time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to try out look for book, may be the publication untitled Graph Theory and Interconnection Networks can be excellent book to read. May be it could be best activity to you.

Karen Plum:

Graph Theory and Interconnection Networks can be one of your nice books that are good idea. Many of us recommend that straight away because this e-book has good vocabulary that can increase your knowledge in vocabulary, easy to understand, bit entertaining however delivering the information. The article writer giving his/her effort to place every word into enjoyment arrangement in writing Graph Theory and Interconnection Networks although doesn't forget the main level, giving the reader the hottest as well as based confirm resource information that maybe you can be among it. This great information can drawn you into new stage of crucial pondering.

Patricia Gagliano:

Are you kind of stressful person, only have 10 or maybe 15 minute in your day to upgrading your mind ability or thinking skill possibly analytical thinking? Then you are experiencing problem with the book as compared to can satisfy your short period of time to read it because this time you only find reserve that need more time to be study. Graph Theory and Interconnection Networks can be your answer given it can be read by you who have those short time problems.

Glenn Herrera:

As a college student exactly feel bored to reading. If their teacher questioned them to go to the library or to make summary for some guide, they are complained. Just tiny students that has reading's soul or real their pastime. They just do what the trainer want, like asked to the library. They go to right now there but nothing reading really. Any students feel that reading through is not important, boring in addition to can't see colorful pictures on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Graph Theory and Interconnection Networks can make you sense more interested to read.
