**Handling Missing Data in Ranked Set Sampling (SpringerBriefs in Statistics)** Carlos N Bouza-Herrera

The existence of missing observations is a very important aspect to be considered in the application of survey sampling, for example. In human populations they may be caused by a refusal of some interviewees to give the true value for the variable of interest. Traditionally, simple random sampling is used to select samples. Most statistical models are supported by the use of samples selected by means of this design. In recent decades, an alternative design has started being used, which, in many cases, shows an improvement in terms of accuracy compared with traditional sampling. It is called Ranked Set Sampling (RSS). A random selection is made with the replacement of samples, which are ordered (ranked). The literature on the subject is increasing due to the potentialities of RSS for deriving more effective alternatives to well-established statistical models. In this work, the use of RSS sub-sampling for obtaining information among the non respondents and different imputation procedures are considered. RSS models are developed as counterparts of well-known simple random sampling (SRS) models. SRS and RSS models for estimating the population using missing data are presented and compared both theoretically and using numerical experiments.

### **From reader reviews:**

#### **Frank Hall:**

Why don't make it to become your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite reserve and reading a reserve. Beside you can solve your long lasting problem; you can add your knowledge by the publication entitled Handling Missing Data in Ranked Set Sampling (SpringerBriefs in Statistics). Try to face the book Handling Missing Data in Ranked Set Sampling (SpringerBriefs in Statistics) as your close friend. It means that it can to become your friend when you sense alone and beside regarding course make you smarter than before. Yeah, it is very fortunated to suit your needs. The book makes you considerably more confidence because you can know every little thing by the book. So , we should make new experience along with knowledge with this book.

#### **Debbie Clark:**

Have you spare time to get a day? What do you do when you have considerably more or little spare time? Yes, you can choose the suitable activity for spend your time. Any person spent their spare time to take a move, shopping, or went to the particular Mall. How about open or even read a book eligible Handling Missing Data in Ranked Set Sampling (SpringerBriefs in Statistics)? Maybe it is to be best activity for you. You already know beside you can spend your time with the favorite's book, you can cleverer than before. Do you agree with it has the opinion or you have different opinion?

#### **Tyler Cote:**

Are you kind of busy person, only have 10 or 15 minute in your moment to upgrading your mind talent or thinking skill even analytical thinking? Then you are having problem with the book compared to can satisfy your small amount of time to read it because this all time you only find guide that need more time to be study. Handling Missing Data in Ranked Set Sampling (SpringerBriefs in Statistics) can be your answer because it can be read by an individual who have those short extra time problems.

#### **Barbara Hall:**

That reserve can make you to feel relax. This kind of book Handling Missing Data in Ranked Set Sampling (SpringerBriefs in Statistics) was multi-colored and of course has pictures on the website. As we know that book Handling Missing Data in Ranked Set Sampling (SpringerBriefs in Statistics) has many kinds or type. Start from kids until teenagers. For example Naruto or Investigation company Conan you can read and believe you are the character on there. So , not at all of book are generally make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book for yourself and try to like reading that.
