Symbolic Play: The Development of Social Understanding

Symbolic Play: The Development of Social Understanding

Symbolic Play: The Development of Social Understanding describes the development of symbolic play from infancy through the preschool years. This text is divided into 12 chapters that focus on make-believe as an activity within which young children spontaneously represent and practice their understanding of the social world.

The first chapter introduces the development of event schemata produced in symbolic play, about children's management of the playframe, and about the development of subjunctive, or "what if" thought. The next chapters are devoted to the development of joint pretending, specifically the use of shared scripts in the organization of make-believe play and the subtleties of metacommunication. These chapters also emphasize the supporting role of the mother in early collaborative make-believe. These topics are followed by discussions of the child's growing ability to represent the internal states of the inanimate figures whose doing can vicariously enact. The remaining chapters focus on social interaction through symbolic play with dolls, toy animals, object props, and language.

This book will prove useful to psychologists and researchers in the fields of human development, society, and family.
