Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series)

Leandro Nunes de Castro

Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series) Leandro Nunes de Castro

Natural computing brings together nature and computing to develop new computational tools for problem solving; to synthesize natural patterns and behaviors in computers; and to potentially design novel types of computers. Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications presents a wide-ranging survey of novel techniques and important applications of nature-based computing.

This book presents theoretical and philosophical discussions, pseudocodes for algorithms, and computing paradigms that illustrate how computational techniques can be used to solve complex problems, simulate nature, explain natural phenomena, and possibly allow the development of new computing technologies. The author features a consistent and approachable, textbook-style format that includes lucid figures, tables, real-world examples, and different types of exercises that complement the concepts while encouraging readers to apply the computational tools in each chapter. Building progressively upon core concepts of nature-inspired techniques, the topics include evolutionary computing, neurocomputing, swarm intelligence, immunocomputing, fractal geometry, artificial life, quantum computing, and DNA computing.

Fundamentals of Natural Computing is a self-contained introduction and a practical guide to nature-based computational approaches that will find numerous applications in a variety of growing fields including engineering, computer science, biological modeling, and bioinformatics.

From reader reviews:

Lonnie Fazio:

As people who live in often the modest era should be revise about what going on or info even knowledge to make all of them keep up with the era that is always change and progress. Some of you maybe may update themselves by reading books. It is a good choice to suit your needs but the problems coming to you is you don't know what type you should start with. This Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series) is our recommendation so you keep up with the world. Why, because book serves what you want and want in this era.

Jim May:

Your reading 6th sense will not betray you actually, why because this Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series) guide written by well-known writer who knows well how to make book that can be understand by anyone who also read the book. Written within good manner for you, leaking every ideas and composing skill only for eliminate your own personal hunger then you still skepticism Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series) as good book but not only by the cover but also by content. This is one book that can break don't assess book by its handle, so do you still needing one more sixth sense to pick this kind of!? Oh come on your examining sixth sense already told you so why you have to listening to another sixth sense.

Bradley Harshbarger:

It is possible to spend your free time to learn this book this e-book. This Fundamentals of Natural Computing: Basic Concepts, Algorithms, and Applications (Chapman & Hall/CRC Computer and Information Science Series) is simple to create you can read it in the area, in the beach, train along with soon. If you did not have got much space to bring the actual printed book, you can buy the particular e-book. It is make you easier to read it. You can save the particular book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.

Devin Glass:

What is your hobby? Have you heard this question when you got learners? We believe that that query was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. And you know that little person just like reading or as reading become their hobby. You need to know that reading is very important in addition to book as to be the thing. Book is important thing to include you knowledge, except your own personal teacher or lecturer. You will find good news or update regarding something by book. A substantial number of sorts of books that can you choose to use be your object. One of them is niagra
