Computational Actuarial Science with R (Chapman & Hall/CRC The R Series)

Computational Actuarial Science with R (Chapman & Hall/CRC The R Series)

A Hands-On Approach to Understanding and Using Actuarial Models

Computational Actuarial Science with R provides an introduction to the computational aspects of actuarial science. Using simple R code, the book helps you understand the algorithms involved in actuarial computations. It also covers more advanced topics, such as parallel computing and C/C++ embedded codes.

After an introduction to the R language, the book is divided into four parts. The first one addresses methodology and statistical modeling issues. The second part discusses the computational facets of life insurance, including life contingencies calculations and prospective life tables. Focusing on finance from an actuarial perspective, the next part presents techniques for modeling stock prices, nonlinear time series, yield curves, interest rates, and portfolio optimization. The last part explains how to use R to deal with computational issues of nonlife insurance.

Taking a do-it-yourself approach to understanding algorithms, this book demystifies the computational aspects of actuarial science. It shows that even complex computations can usually be done without too much trouble. Datasets used in the text are available in an R package (CASdatasets).

From reader reviews:

Lois Maestas:

Now a day people that Living in the era where everything reachable by connect with the internet and the resources inside can be true or not call for people to be aware of each info they get. How many people to be smart in receiving any information nowadays? Of course the solution is reading a book. Reading a book can help persons out of this uncertainty Information especially this Computational Actuarial Science with R (Chapman & Hall/CRC The R Series) book as this book offers you rich info and knowledge. Of course the data in this book hundred % guarantees there is no doubt in it you probably know this.

Jason Ayers:

Reading a book to be new life style in this year; every people loves to study a book. When you study a book you can get a wide range of benefit. When you read guides, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what sorts of book that you have read. If you want to get information about your research, you can read education books, but if you want to entertain yourself look for a fiction books, these us novel, comics, as well as soon. The Computational Actuarial Science with R (Chapman & Hall/CRC The R Series) offer you a new experience in studying a book.

Judith Craig:

As we know that book is important thing to add our information for everything. By a reserve we can know everything we wish. A book is a set of written, printed, illustrated or maybe blank sheet. Every year had been exactly added. This publication Computational Actuarial Science with R (Chapman & Hall/CRC The R Series) was filled regarding science. Spend your spare time to add your knowledge about your scientific research competence. Some people has distinct feel when they reading some sort of book. If you know how big benefit of a book, you can feel enjoy to read a publication. In the modern era like now, many ways to get book you wanted.

Cindy Coleman:

Reading a guide make you to get more knowledge as a result. You can take knowledge and information from a book. Book is written or printed or outlined from each source that will filled update of news. With this modern era like today, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, book and comic. You can add your understanding by that book. Isn't it time to spend your spare time to open your book? Or just in search of the Computational Actuarial Science with R (Chapman & Hall/CRC The R Series) when you essential it?
