Modern General Topology: 33 (North-Holland Mathematical Library)

J.-I. Nagata

Modern General Topology: 33 (North-Holland Mathematical Library) J.-I. Nagata

This classic work has been fundamentally revised to take account of recent developments in general topology. The first three chapters remain unchanged except for numerous minor corrections and additional exercises, but chapters IV-VII and the new chapter VIII cover the rapid changes that have occurred since 1968 when the first edition appeared.

The reader will find many new topics in chapters IV-VIII, e.g. theory of Wallmann-Shanin's compactification, realcompact space, various generalizations of paracompactness, generalized metric spaces, Dugundji type extension theory, linearly ordered topological space, theory of cardinal functions, dyadic space, etc., that were, in the author's opinion, mostly special or isolated topics some twenty years ago but now settle down into the mainstream of general topology.

From reader reviews:

Linda Gaitan:

The book Modern General Topology: 33 (North-Holland Mathematical Library) make one feel enjoy for your spare time. You should use to make your capable considerably more increase. Book can being your best friend when you getting anxiety or having big problem along with your subject. If you can make reading a book Modern General Topology: 33 (North-Holland Mathematical Library) being your habit, you can get more advantages, like add your own capable, increase your knowledge about a few or all subjects. It is possible to know everything if you like open up and read a guide Modern General Topology: 33 (North-Holland Mathematical Library). Kinds of book are a lot of. It means that, science book or encyclopedia or others. So , how do you think about this book?

Erna Taylor:

The book Modern General Topology: 33 (North-Holland Mathematical Library) can give more knowledge and information about everything you want. Why must we leave the good thing like a book Modern General Topology: 33 (North-Holland Mathematical Library)? Wide variety you have a different opinion about reserve. But one aim in which book can give many details for us. It is absolutely suitable. Right now, try to closer with your book. Knowledge or info that you take for that, you may give for each other; you can share all of these. Book Modern General Topology: 33 (North-Holland Mathematical Library) has simple shape however you know: it has great and large function for you. You can appear the enormous world by open and read a e-book. So it is very wonderful.

Wendy Kroll:

People live in this new day time of lifestyle always try and and must have the free time or they will get wide range of stress from both daily life and work. So , whenever we ask do people have extra time, we will say absolutely sure. People is human not just a robot. Then we request again, what kind of activity do you possess when the spare time coming to an individual of course your answer can unlimited right. Then do you try this one, reading ebooks. It can be your alternative in spending your spare time, typically the book you have read is actually Modern General Topology: 33 (North-Holland Mathematical Library).

Jerry Schooler:

On this era which is the greater man or woman or who has ability to do something more are more precious than other. Do you want to become considered one of it? It is just simple approach to have that. What you need to do is just spending your time not much but quite enough to have a look at some books. One of several books in the top listing in your reading list is Modern General Topology: 33 (North-Holland Mathematical Library). This book that is certainly qualified as The Hungry Mountains can get you closer in becoming precious person. By looking right up and review this publication you can get many advantages.
