## Nuclear Decommissioning: Planning, Execution and International Experience (Woodhead Publishing Series in Energy)

Once a nuclear installation has reached the end of its safe and economical operational lifetime, the need for its decommissioning arises. Different strategies can be employed for nuclear decommissioning, based on the evaluation of particular hazards and their attendant risks, as well as on the analysis of costs of clean-up and waste management. This allows for decommissioning either soon after permanent shutdown, or perhaps a long time later, the latter course allowing for radioactivity levels to drop in any activated or contaminated components. It is crucial for clear processes and best practices to be applied in decommissioning such installations and sites, particular where any significant health and environmental risks exist.

This book critically reviews the nuclear decommissioning processes and technologies applicable to nuclear power plants and other civilian nuclear facilities. Part one focuses on the fundamental planning issues in starting a nuclear decommissioning process, from principles and safety regulations, to financing and project management. Part two covers the execution phase of nuclear decommissioning projects, detailing processes and technologies such as dismantling, decontamination, and radioactive waste management, as well as environmental remediation, site clearance and reuse. Finally, part three details international experience in the decommissioning of nuclear applications, including the main nuclear reactor types and nuclear fuel cycle facilities, as well as small nuclear facilities and legacy nuclear waste sites.

- Critically reviews nuclear decommissioning processes and technologies applicable to nuclear power plants and other civilian nuclear facilities
- Discusses the fundamental planning issues in starting a nuclear decommissioning process
- Considers the execution phase of nuclear decommissioning projects, including dismantling, decontamination, and radioactive waste management, as well as environmental remediation, site clearance and reuse

### **From reader reviews:**

#### **Mike Greene:**

What do you in relation to book? It is not important along? Or just adding material when you require something to explain what you problem? How about your time? Or are you busy particular person? If you don't have spare time to complete others business, it is gives you the sense of being bored faster. And you have extra time? What did you do? Everyone has many questions above. They should answer that question since just their can do that will. It said that about reserve. Book is familiar on every person. Yes, it is proper. Because start from on pre-school until university need this Nuclear Decommissioning: Planning, Execution and International Experience (Woodhead Publishing Series in Energy) to read.

#### **Rebecca Kurtz:**

Reading a reserve can be one of a lot of exercise that everyone in the world loves. Do you like reading book and so. There are a lot of reasons why people like it. First reading a guide will give you a lot of new information. When you read a reserve you will get new information mainly because book is one of a number of ways to share the information or perhaps their idea. Second, reading through a book will make a person more imaginative. When you looking at a book especially fiction book the author will bring that you imagine the story how the characters do it anything. Third, it is possible to share your knowledge to other people. When you read this Nuclear Decommissioning: Planning, Execution and International Experience (Woodhead Publishing Series in Energy), you can tells your family, friends as well as soon about yours guide. Your knowledge can inspire the mediocre, make them reading a reserve.

#### **Jessica Ball:**

This Nuclear Decommissioning: Planning, Execution and International Experience (Woodhead Publishing Series in Energy) is great reserve for you because the content and that is full of information for you who have always deal with world and possess to make decision every minute. This book reveal it information accurately using great arrange word or we can declare no rambling sentences inside. So if you are read this hurriedly you can have whole data in it. Doesn't mean it only provides straight forward sentences but hard core information with lovely delivering sentences. Having Nuclear Decommissioning: Planning, Execution and International Experience (Woodhead Publishing Series in Energy) in your hand like having the world in your arm, facts in it is not ridiculous one. We can say that no book that offer you world with ten or fifteen second right but this guide already do that. So , this really is good reading book. Hey there Mr. and Mrs. occupied do you still doubt this?

#### **Thomas Kelly:**

What is your hobby? Have you heard that question when you got pupils? We believe that that query was given by teacher on their students. Many kinds of hobby, Every person has different hobby. And also you know that little person just like reading or as studying become their hobby. You need to know that reading is

very important along with book as to be the point. Book is important thing to include you knowledge, except your current teacher or lecturer. You will find good news or update with regards to something by book. Amount types of books that can you choose to use be your object. One of them is Nuclear Decommissioning: Planning, Execution and International Experience (Woodhead Publishing Series in Energy).
