Skill Training in Multimodal Virtual Environments (Human Factors and Ergonomics)

Skill Training in Multimodal Virtual Environments (Human Factors and Ergonomics)

The advent of augmented reality technologies used to assist human operators in complex manipulative operations—has brought an urgency to research into the modeling and training of human skills in Virtual Environments. However, modeling a specific act still represents a challenge in cognitive science. The same applies for the control of humanoid robots and the replication of skilled behavior of avatars in Virtual Environments.

Skill Training in Multimodal Virtual Environments presents the scientific background, research outcomes, engineering developments, and evaluation studies conducted during the five years (2006-2011) of the project SKILLS–Multimodal Interfaces for Capturing and Transfer of Skill, funded by the European Commission under its 6th Framework Programme for Research and Technological Development. The SKILLS project evaluated how to exploit robotics and virtual environment technologies for the training of specific skills. This book details the novel approach used in the study to cope with skill acquisition, setting aside the mainstream assumptions of common computer-assisted training simulators. It explores how the SKILLS approach generated new training scenarios that allow users to practice new experiences in the performance of the devised task.

Using a carefully designed approach that balances science with practicality, the book explores how virtual and augmented reality systems can be designed to address the skill transfer and training in different application contexts. The application of the same roadmap to skills originating from domains such as sports, rehabilitation, industrial environment, and surgery sets this book apart. It demonstrates how technology-oriented training conditions can yield better results than more traditional training conditions.

From reader reviews:

Gerald Warfield:

This Skill Training in Multimodal Virtual Environments (Human Factors and Ergonomics) book is simply not ordinary book, you have it then the world is in your hands. The benefit you will get by reading this book is actually information inside this publication incredible fresh, you will get details which is getting deeper you read a lot of information you will get. This Skill Training in Multimodal Virtual Environments (Human Factors and Ergonomics) without we realize teach the one who examining it become critical in considering and analyzing. Don't possibly be worry Skill Training in Multimodal Virtual Environments (Human Factors and Ergonomics) can bring whenever you are and not make your tote space or bookshelves' turn into full because you can have it in the lovely laptop even mobile phone. This Skill Training in Multimodal Virtual Environments (Human Factors and Ergonomics) having good arrangement in word and also layout, so you will not sense uninterested in reading.

Martin Duval:

Do you one of people who can't read gratifying if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Skill Training in Multimodal Virtual Environments (Human Factors and Ergonomics) book is readable by means of you who hate the perfect word style. You will find the data here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to give to you. The writer involving Skill Training in Multimodal Virtual Environments (Human Factors and Ergonomics) content conveys objective easily to understand by a lot of people. The printed and e-book are not different in the content but it just different available as it. So , do you nevertheless thinking Skill Training in Multimodal Virtual Environments (Human Factors and Ergonomics) is not loveable to be your top collection reading book?

Fran Short:

The publication with title Skill Training in Multimodal Virtual Environments (Human Factors and Ergonomics) possesses a lot of information that you can learn it. You can get a lot of help after read this book. This kind of book exist new understanding the information that exist in this reserve represented the condition of the world now. That is important to yo7u to understand how the improvement of the world. This book will bring you in new era of the the positive effect. You can read the e-book in your smart phone, so you can read the idea anywhere you want.

Felecia Holst:

This Skill Training in Multimodal Virtual Environments (Human Factors and Ergonomics) is new way for you who has attention to look for some information given it relief your hunger of information. Getting deeper you into it getting knowledge more you know otherwise you who still having bit of digest in reading this Skill Training in Multimodal Virtual Environments (Human Factors and Ergonomics) can be the light

food for you personally because the information inside this kind of book is easy to get by anyone. These books build itself in the form that is reachable by anyone, that's why I mean in the e-book application form. People who think that in book form make them feel sleepy even dizzy this guide is the answer. So there is not any in reading a book especially this one. You can find what you are looking for. It should be here for you. So , don't miss this! Just read this e-book kind for your better life and also knowledge.
