Evolved Cellular Network Planning and Optimization for UMTS and LTE

Evolved Cellular Network Planning and Optimization for UMTS and LTE

Most books on network planning and optimization provide limited coverage of either GSM or WCDMA techniques. Few scrape the surface of HSPA, and even fewer deal with TD-SCDMA. Filling this void, **Evolved Cellular Network Planning and Optimization for UMTS and LTE** presents an accessible introduction to all stages of planning and optimizing UMTS, HSPA, and LTE cellular networks.

Supplying a comprehensive explanation of the fundamental aspects of current and future cellular networks, the text starts with an overview of each type of network, including basic techniques and channel models. Next, it examines the challenges operators and vendors are likely to face—explaining the critical role network planning and optimization play in addressing these challenges. The book details effective system-level simulation methods, it also provides:

- A complete overview of UMTS, HSPA, and LTE networks
- Techniques for planning and optimizing cellular networks
- An examination of inter-operation issues with existing cellular networks
- Coverage of the challenges in deploying LTE and relay networks

In addition to exploring the procedures for planning and optimizing each type of network, the text covers techniques for major mechanisms, trending, troubleshooting, and conducting radio performance analysis. Paying special attention to compatibility issues among these networks, this book provides the understanding required to deploy and optimize networks that meet the growing demands for mobile data solutions.

From reader reviews:

Dewey Newkirk:

Why don't make it to be your habit? Right now, try to ready your time to do the important action, like looking for your favorite book and reading a e-book. Beside you can solve your long lasting problem; you can add your knowledge by the e-book entitled Evolved Cellular Network Planning and Optimization for UMTS and LTE. Try to make the book Evolved Cellular Network Planning and Optimization for UMTS and LTE as your friend. It means that it can to become your friend when you experience alone and beside those of course make you smarter than before. Yeah, it is very fortunated to suit your needs. The book makes you considerably more confidence because you can know everything by the book. So , we need to make new experience in addition to knowledge with this book.

Kevin Porter:

Have you spare time to get a day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity regarding spend your time. Any person spent all their spare time to take a wander, shopping, or went to typically the Mall. How about open or even read a book entitled Evolved Cellular Network Planning and Optimization for UMTS and LTE? Maybe it is for being best activity for you. You realize beside you can spend your time along with your favorite's book, you can smarter than before. Do you agree with it is opinion or you have different opinion?

Aaron Tolleson:

Information is provisions for anyone to get better life, information presently can get by anyone in everywhere. The information can be a understanding or any news even a concern. What people must be consider when those information which is inside former life are challenging be find than now is taking seriously which one is acceptable to believe or which one the actual resource are convinced. If you find the unstable resource then you buy it as your main information there will be huge disadvantage for you. All those possibilities will not happen in you if you take Evolved Cellular Network Planning and Optimization for UMTS and LTE as your daily resource information.

Gerri Pettit:

Don't be worry for anyone who is afraid that this book can filled the space in your house, you might have it in e-book method, more simple and reachable. This particular Evolved Cellular Network Planning and Optimization for UMTS and LTE can give you a lot of friends because by you taking a look at this one book you have issue that they don't and make anyone more like an interesting person. That book can be one of one step for you to get success. This guide offer you information that probably your friend doesn't recognize, by knowing more than various other make you to be great persons. So , why hesitate? We should have Evolved Cellular Network Planning and Optimization for UMTS and LTE.
