Speech Processing in Embedded Systems Priyabrata Sinha

Speech Processing has rapidly emerged as one of the most widespread and well-understood application areas in the broader discipline of Digital Signal Processing. Besides the telecommunications applications that have hitherto been the largest users of speech processing algorithms, several non-traditional embedded processor applications are enhancing their functionality and user interfaces by utilizing various aspects of speech processing.

"Speech Processing in Embedded Systems" describes several areas of speech processing, and the various algorithms and industry standards that address each of these areas. The topics covered include different types of Speech Compression, Echo Cancellation, Noise Suppression, Speech Recognition and Speech Synthesis. In addition this book explores various issues and considerations related to efficient implementation of these algorithms on real-time embedded systems, including the role played by processor CPU and peripheral functionality.

From reader reviews:

Alicia Wescott:

Nowadays reading books are more than want or need but also be a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want get more knowledge just go with schooling books but if you want truly feel happy read one having theme for entertaining like comic or novel. The Speech Processing in Embedded Systems is kind of publication which is giving the reader unpredictable experience.

Kim Duncan:

Reading can called brain hangout, why? Because if you find yourself reading a book particularly book entitled Speech Processing in Embedded Systems the mind will drift away trough every dimension, wandering in every single aspect that maybe unknown for but surely will become your mind friends. Imaging every word written in a reserve then become one contact form conclusion and explanation this maybe you never get just before. The Speech Processing in Embedded Systems giving you a different experience more than blown away your head but also giving you useful facts for your better life in this era. So now let us demonstrate the relaxing pattern is your body and mind will likely be pleased when you are finished reading it, like winning a sport. Do you want to try this extraordinary shelling out spare time activity?

Eddie Horton:

Many people spending their time period by playing outside using friends, fun activity together with family or just watching TV the whole day. You can have new activity to enjoy your whole day by examining a book. Ugh, do you consider reading a book can really hard because you have to use the book everywhere? It fine you can have the e-book, getting everywhere you want in your Cell phone. Like Speech Processing in Embedded Systems which is having the e-book version. So, try out this book? Let's view.

Eric Ballentine:

As a university student exactly feel bored for you to reading. If their teacher asked them to go to the library as well as to make summary for some book, they are complained. Just tiny students that has reading's soul or real their hobby. They just do what the professor want, like asked to the library. They go to there but nothing reading critically. Any students feel that reading through is not important, boring in addition to can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this era, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore, this Speech Processing in Embedded Systems can make you experience more interested to read.
