Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications

Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications

Bioprocessing for Value-Added Products from Renewable Resources provides a timely review of new and unconventional techniques to manufacture high-value products based on simple biological material. The current source for most chemicals and materials is petroleum. Anticipation of its limited future availability, along with record high prices has spurred interest in alternatives that will be both sustainable and cost-effective.

In a very structured way this book begins by describing the modern technologies that form the basis for creating a bio-based industry. Next it lists the various organisms that are suitable for bioprocessing -from bacteria to algae- and it gives their unique characteristics. These first two parts set the stage for a variety of novel, experimental bioprocesses, such as the production of medicinal chemicals, the production of chiral compounds and the design of biofuel cells. Concludes with examples where biological, renewable resources become an important feedstock for large-scale industrial production.

Bioprocessing for Value-Added Products from Renewable Resources provides a unique perspective of the industry and the field and serves as an important guide towards the future. The book is suitable for researchers, practitioners, students, and consultants in the bioprocess and biotechnology fields.

- Reviews the principles underpinning modern industrial biotechnology
- Provides a unique collection of novel bioprocesses for a sustainable future
- Gives examples of economical use of renewable resources as feedstocks
- Suitable for both non-experts and experts in the bioproduct industry

From reader reviews:

Betty Castaneda:

Book is to be different for each and every grade. Book for children till adult are different content. As you may know that book is very important usually. The book Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications has been making you to know about other understanding and of course you can take more information. It is quite advantages for you. The book Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications is not only giving you more new information but also to be your friend when you experience bored. You can spend your own personal spend time to read your guide. Try to make relationship while using book Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications. You never truly feel lose out for everything if you read some books.

Charles Smith:

The reserve with title Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications possesses a lot of information that you can understand it. You can get a lot of profit after read this book. That book exist new understanding the information that exist in this reserve represented the condition of the world today. That is important to yo7u to understand how the improvement of the world. This particular book will bring you within new era of the internationalization. You can read the e-book on your smart phone, so you can read this anywhere you want.

Anna Baron:

A lot of people always spent their own free time to vacation as well as go to the outside with them family members or their friend. Did you know? Many a lot of people spent many people free time just watching TV, or maybe playing video games all day long. If you want to try to find a new activity that's look different you can read some sort of book. It is really fun for you personally. If you enjoy the book that you read you can spent all day every day to reading a book. The book Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications it is quite good to read. There are a lot of people that recommended this book. These were enjoying reading this book. In the event you did not have enough space to develop this book you can buy the e-book. You can m0ore simply to read this book from your smart phone. The price is not too costly but this book has high quality.

Frankie Lampkins:

Why? Because this Bioprocessing for Value-Added Products from Renewable Resources: New Technologies and Applications is an unordinary book that the inside of the book waiting for you to snap it but latter it will zap you with the secret that inside. Reading this book beside it was fantastic author who also write the book in such awesome way makes the content interior easier to understand, entertaining approach but still convey the meaning totally. So , it is good for you because of not hesitating having this anymore or you going to

regret it. This unique book will give you a lot of positive aspects than the other book possess such as help improving your talent and your critical thinking technique. So , still want to postpone having that book? If I were being you I will go to the guide store hurriedly.
