Owning the Technical Baseline for Acquisition Programs in the U.S. Air Force: A Workshop Report

Committee on Owning the Technical Baseline in the U.S. Air Force: A Workshop, Air Force Studies Board, Division on Engineering and Physical Sciences, National Research Council

The U.S. Air Force has experienced many acquisition program failures - cost overruns, schedule delays, system performance problems, and sustainability concerns - over program lifetimes. A key contributing factor is the lack of sufficient technical knowledge within the Air Force concerning the systems being acquired to ensure success.

To examine this issue, the Assistant Secretary of the Air Force for Acquisition requested that the Air Force Studies Board of the National Research Council undertake a workshop to identify the essential elements of the technical baseline - data and information to establish, trade-off, verify, change, accept, and sustain functional capabilities, design characteristics, affordability, schedule, and quantified performance parameters at the chosen level of the system hierarchy - that would benefit from realignment under Air Force or government ownership, and the value to the Air Force of regaining ownership under its design capture process of the future. Over the course of three workshops from November 2014 through January 2015, presenters and participants identified the barriers that must be addressed for the Air Force to regain technical baseline control to include workforce, policy and process, funding, culture, contracts, and other factors and provided a terms of reference for a possible follow-on study to explore the issues and make recommendations required to implement and institutionalize the technical baseline concept. *Owning the Technical Baseline for Acquisition Programs in the U.S. Air Force* summarizes the presentations and discussion of the three workshops.

From reader reviews:

Verna Smith:

Do you have favorite book? When you have, what is your favorite's book? Book is very important thing for us to understand everything in the world. Each reserve has different aim or maybe goal; it means that reserve has different type. Some people sense enjoy to spend their time for you to read a book. They may be reading whatever they take because their hobby is usually reading a book. Why not the person who don't like reading a book? Sometime, man feel need book whenever they found difficult problem or perhaps exercise. Well, probably you will need this Owing the Technical Baseline for Acquisition Programs in the U.S. Air Force: A Workshop Report.

Charles Beaudoin:

Hey guys, do you would like to finds a new book you just read? May be the book with the headline Owing the Technical Baseline for Acquisition Programs in the U.S. Air Force: A Workshop Report suitable to you? The actual book was written by well known writer in this era. Typically the book untitled Owing the Technical Baseline for Acquisition Programs in the U.S. Air Force: A Workshop Report is a single of several books in which everyone read now. This specific book was inspired a lot of people in the world. When you read this reserve you will enter the new shape that you ever know just before. The author explained their strategy in the simple way, so all of people can easily to understand the core of this e-book. This book will give you a wide range of information about this world now. So that you can see the represented of the world in this particular book.

Scott Roche:

As we know that book is essential thing to add our information for everything. By a reserve we can know everything we really wish for. A book is a list of written, printed, illustrated as well as blank sheet. Every year seemed to be exactly added. This publication Owing the Technical Baseline for Acquisition Programs in the U.S. Air Force: A Workshop Report was filled with regards to science. Spend your spare time to add your knowledge about your scientific research competence. Some people has diverse feel when they reading a new book. If you know how big good thing about a book, you can truly feel enjoy to read a publication. In the modern era like now, many ways to get book you wanted.

Matthew Gregg:

Reading a publication make you to get more knowledge from that. You can take knowledge and information from a book. Book is written or printed or descriptive from each source this filled update of news. With this modern era like currently, many ways to get information are available for you. From media social just like newspaper, magazines, science book, encyclopedia, reference book, novel and comic. You can add your

understanding by that book. Are you hip to spend your spare time to open your book? Or just searching for the Owing the Technical Baseline for Acquisition Programs in the U.S. Air Force: A Workshop Report when you desired it?
