## **The Role of Aging in Atherosclerosis: The Sequestration Hypothesis** R.E. Tracy

The cover of this book summarizes the central features of the sequestration hypothesis: Commonplace appearances seen in human coronary artery, fat stained in paraffin sections by a new technique explained in Chapter Eleven, are arranged to suggest pathways of evolution toward atheroma. The hypothesis formulated and defended in the pages of this book is this: Fibroplasia progresses upward in column "a" from "1a" to "3a" as a characteristic feature of aging. This starts sooner and progresses faster in men than in women. Numbers of SMC's remain essentially constant so that fibroplasia per SMC steadily increases. The rise upward conveys an increasing propensity to sequester atherogenic lipids, causing transition rightward into column "b". Sequestered extracellular lipid then attracts fatty streak elements, especially foam cells and lymphocytes, to propel the arterial site rightward into column "c". Frame "1c" corresponds to the AHA Lesions Committee classification type IIb, the progression resistant fatty streak arising directly without prior lipid sequestration; this can progress to atheroma, but slowly after much delay, although extreme provocation can accelerate the process. Such progression is rightward toward atheroma with thin cap, not upward toward fibroplastic thickening. Frame "2c" corresponds to the AHA classification, type Ha, progression prone fatty streaks. These readily evolve into atheroma, again by horizontal progression.

### **From reader reviews:**

#### **Angel Garcia:**

Often the book *The Role of Aging in Atherosclerosis: The Sequestration Hypothesis* has a lot of information on it. So when you make sure to read this book you can get a lot of benefit. The book was authored by the very famous author. The author makes some research ahead of write this book. This specific book very easy to read you can obtain the point easily after reading this book.

#### **Calvin Williams:**

Playing with family in the park, coming to see the water world or hanging out with buddies is thing that usually you have done when you have spare time, in that case why you don't try issue that really opposite from that. One activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of information. Even you love *The Role of Aging in Atherosclerosis: The Sequestration Hypothesis*, it is possible to enjoy both. It is excellent combination right, you still need to miss it? What kind of hangout type is it? Oh occur its mind hangout guys. What? Still don't understand it, oh come on its identified as reading friends.

#### **Ryan Young:**

Your reading 6th sense will not betray you, why because this *The Role of Aging in Atherosclerosis: The Sequestration Hypothesis* reserve written by well-known writer who knows well how to make book which might be understand by anyone who else read the book. Written with good manner for you, dripping every ideas and writing skill only for eliminate your current hunger then you still uncertainty *The Role of Aging in Atherosclerosis: The Sequestration Hypothesis* as good book not just by the cover but also by the content. This is one guide that can break don't evaluate book by its cover, so do you still needing a different sixth sense to pick this kind of!? Oh come on your reading through sixth sense already told you so why you have to listening to one more sixth sense.

#### **Oliver Lyle:**

What is your hobby? Have you heard that will question when you got students? We believe that that concern was given by teacher to the students. Many kinds of hobby, Every person has different hobby. And you also know that little person including reading or as reading through become their hobby. You need to understand that reading is very important and also book as to be the point. Book is important thing to include you knowledge, except your own teacher or lecturer. You discover good news or update regarding something by book. Different categories of books that can you choose to adopt be your object. One of them is niagra *The Role of Aging in Atherosclerosis: The Sequestration Hypothesis*.
